

# Farmers Fertilizer **5-0-0-13(S)** Custom Fertilizer Blend

Derived From: Ammonium Sulfate, Sulfuric Acid and Organic Acids.

This product is safe to apply through drip irrigation systems.

**Safer Acid** is a water-soluble liquid fertilizer important to healthy plant development. **Safer Acid** can be applied directly to the soil or metered into your irrigation water.

**Safer Acid** is an excellent choice for irrigation water treatment. It reduces bicarbonates to avoid alkalinity, poor soil structure and low fertility. **Safer Acid** also solubilizes micronutrients that may be unavailable due to high soil pH, making them available to your crop.

**Acidic fertilizer materials** will reduce pH and dissolve free lime which will liberate soluble Calcium.

For specific usage rates and application information contact your Farmers Fertilizer sales representatives or your crop care advisor:
